SIMERDEEP SINGH GANDHI

Agra | +91 7455897944 | simerdeepsingh567@gmail.com | LinkedIn | GitHub | Portfolio | GFG

SUMMARY

Product-focused full-stack developer who learns fast, builds independently, and ships real features end-to-end. Proficient in full-stack development using React.js, Node.js, and MongoDB, with experience in building real-time distributed applications. Passionate about solving challenging problems, optimizing performance, and delivering customer focused solutions. Comfortable taking ownership of features, asking questions early, and iterating fast based on user feedback.

EDUCATION

Bachelor of Computer Applications, *GLA University, Mathura* Jun 2025

Intermediate, John Milton Public School, Agra Jul 2022

PROJECTS

JOYTRIP (Ride Service Application) Jun 2024

Full Stack Developer

- Developed a ride service application using MERN stack and WebSocket to streamline city travel for users.
- Enabled users to visit multiple locations in a single ride, eliminating the need for repeated bookings and improving overall user experience.
- Handled data consistency and fault-tolerance challenges in a real-time booking feature using WebSocket and MongoDB.

V.O.L.T (Voice to Output Language Transcription) Web-App Nov 2024

Full Stack Developer

- Developed a real-time multilingual transcription app using React.js, Node.js, and Whisper APIs, enabling seamless cross-language communication.
- Integrated sentiment analysis and tone transformation (formal/informal) to enhance usability across professional and personal contexts.
- Optimized system for scalability and low latency, ensuring smooth performance for multiple concurrent users.

MENTORA (Learning Management System) Web-App May 2025

Full-Stack Developer

- Developed a scalable LMS offering personalized learning for students and streamlined course management for educators.
- Integrated secure payment gateways, JWT-based authentication, and real-time features for a smooth user experience.
- Built with React.js, Redux, Vite, Shadcn UI, Node.js, Express.js, and MongoDB; used Cloudinary for efficient media management.
- Delivered a clean UI, responsive layout, and reliable performance across user roles (student/instructor/admin).

MCP-Powered Terminal AI Assistant Aug 2025

Full Stack Developer

- Developed a terminal-based AI assistant using Node.js, Gemini AI, and MCP, enabling tasks like file operations, content creation, and social media automation.
- Built a modular MCP tool server to manage Twitter posting, trending hashtags, image fetching, and file handling.
- Designed an interactive CLI client with conversational AI, allowing users to execute complex workflows using natural language commands.

SKILLS

- **Languages:** Java, Python, PHP, JavaScript
- **CS Fundamentals:** Data Structures, Algorithms, OOPs
- **Web Development:** HTML5, CSS3, SCSS, Angular, React.js, Node.js, Express.js, REST APIs
- **Databases:** MySQL, MongoDB, Firebase
- **Tools & Platforms:** Git, Postman, Cloudinary
- **Soft Skills:** Problem-Solving, Teamwork, Communication, Analytical Thinking, Adaptability

ACHIEVEMENTS

- Completed **GeeksforGeeks 160 Days of DSA Challenge (2025)** – Solved 100+ DSA problems across core topics as part of the GFG 160-Days Challenge.
- Participated in Hack-Vision Hackathon – built a prototype web app in 10 hours with a team of 4; secured 3rd runner-up.
